Highest image resolution

Image plate plus

Thanks to an image resolution of 22 LP/mm, Image Plates Plus are superior to X-ray film when it comes to picking up detail – and therefore superior to the competition as well. The reusable image plates are particularly thin and flexible, and therefore comfortable for patients.

Our range of intraoral image plates

Safe and reliable to use

Optimum protection

The light protection covers for Image Plates Plus for protection against incident light and contamination are made of material that has been certified to comply with health requirements, they are 100 % hygienically leak-tight and have narrow edges and a notch on both sides for left and right-handed users. Their exceptional impermeability to light has been demonstrated in studies.

Simple handling

Image Plate and Film Holder System Set Color

Image plate holders from Dürr Dental offer optimum protection for the image plate with their smoothed and rounded edges. The special stepped design of the right-angle technique Color aiming rings enables simple and safe aiming of the X-ray tube. Holders are available for all applications – their use helps to ensure that accurate X-ray images are produced. The colour coding of the various image plate holders enables simple and error-free handling.
