FD 360 cleaning and care of vinyl upholstery

FD 360 at a glance

- Cleaning fluid for deep cleaning and care of synthetic leather surfaces.
- Intensive cleaning action – removes stains of all kinds, spots, and discolourations.
- Excellent material compatibility - suitable for synthetic leather coverings.
- Environmentally safe, propellant-free spray bottle.
- Set with 500-mL spray bottle and 10 special sponges.

Properties

FD 360 from Dürr System Hygiene cleans and preserves all synthetic leather upholstery, significantly maintaining the value of treatment chairs and other furnishings with synthetic leather coverings. When used together with the special sponge provided in the set, FD 360 quickly and deeply removes even stubborn stains, soiling, and discolourations caused, for example, by non-colourfast clothing. FD 360 provides for deep and intensive, residue-free cleaning and care with a silky shine.

Product composition

The FD 360 mechanism of action is based on a combination of special surfactants, silicone compounds, and avocado oil-based care components.

Directions for use

Apply FD 360 cleaning fluid undiluted. Spray FD 360 on the surface to be cleaned and immediately wipe with a cloth or scrub with the special sponge for intensive cleaning with FD 360. Using the sponge enables more thorough, deeper cleaning. Combining FD 360 with the special sponge removes even stubborn stains and discolourations from upholstery. Then remove any excess FD 360 by wiping the surface with a dry cloth. Use FD 360 daily, as needed.

Environmental impact

FD 360 is ecologically safe. It is applied using a patented, propellant-free spray bottle. The surfactants conform to the requirements for biodegradability. The packaging can be recycled or incinerated. For recycling: Flush bottles with water.

Physical data

Appearance: milky, white liquid
Density: $D = 0.99 \pm 0.05 \text{ g/cm}^3$ (20°C)
pH: 3.6 ± 0.5

Shelf life

3 years

Product information

FD 360 cleaning and care of vinyl upholstery

Package size

Set with 500-mL spray bottle and 10 special sponges in the box.

Storage

Store product at between 5°C and room temperature.

General instructions

FD 360 is safe for use on all synthetic leather surfaces. In the case of other leather surfaces, test for material compatibility in an inconspicuous place. The special sponges are not permitted to be used on leather. Changes in product colour/odour may occur, especially when stored in sunlight. However, these changes in colour and/or odour have no impact on the disinfection efficacy of the product.

Hazard warnings

FD 360 is classified in accordance with the CLP Regulation and is not required to be labelled.
