The stakes are high.
We work **with people.**

Backbone doesn't come from the stock exchange: W&H has been a family-owned company for generations. This is the origin of the spirit of innovation that develops devices such as Implantmed, Elcomed and Piezomed.

The secret of our success: W&H has always placed people – regardless of whether they are partners, customers, patients or employees – in the centre. See for yourself – it's no longer a secret! We don't want to keep any secrets from you.

Dr. med. dent. Fred Bergmann
dentist specializing in oral surgery.

»The combination of Implantmed and Osstell ISQ module ensures improved treatment safety for me and my patients.«

Implantmed Plus

- › Intuitive user interface
- › New pump design
- › Ultra-short, powerful electric motor with 6.2 Ncm torque
- › Motor speed range: 200 up to 40,000 rpm
- › W&H Osstell ISQ module (available as an accessory) for a precise measurable implant stability
- › Automatic torque control: 5 up to 80 Ncm
- › Automatic thread cutter function
- › Electric motor with cable, thermo washer disinfectable and sterilizable

Dr. med. dent. Robert Schwagierek, M. A.
dentist specializing in oral surgery.

»Ease of use makes it possible: high degree of safety and high-quality treatment for patients. Maximum efficiency in everyday practice.«

Implantmed Classic

- › Intuitive operating concept, large, easy-to-read display
- › Ultra-short, powerful electric motor with 5.5 Ncm torque
- › Motor speed range: 300 – 40,000 rpm
- › Precise torque control, 5 – 70 Ncm
- › Automatic thread cutter function
- › Electric motor with cable, thermo washer disinfectable and sterilisable

PD Dr. Jörg Neugebauer
dentist specializing in oral surgery.

»There is no time for compromises during the surgical procedure. Elcomed is clearly number 1 in the operating theatre.«

Elcomed

- › All information in one user level
- › Complete documentation via USB flash drive
- › Shortest and lightest motor with 50,000 rpm
- › Up to 80 Ncm on the rotary instrument
- › 6 programs with individually adjustable parameters
- › Automatic thread cutter function
- › Motor with cable, thermo washer disinfectable and sterilizable

Your **advantages** at a glance

Dr. Alexander Schatzdorfer
dentist with his own practice.

»Ideal for Implantmed and Elcomed:
precise and reliable!«

Surgical straight and contra-angle handpieces with generator With and without mini LED+

- › Fatigue-free working thanks to optimal ergonomics
- › Durable and robust due to high-quality stainless steel and scratch-resistant coating
- › Can be dismantled for thorough cleaning (except WI-75 E/KM)
- › Thermo washer disinfectable and sterilizable

With mini LED+

- › Work with daylight quality
- › Natural reproduction of red tones
- › Independent power supply with integrated generator
- › Longer life compared to conventional halogen bulbs

»The prosthodontic screwdriver
with torque control! It tightens the
retaining screw to the perfect tightness.«

Surgical straight and contra-angle handpieces With mini LED+ and W&H connection

- › Matched to Implantmed SI-1023, SI-1015 and SI-1010
- › Optimal illumination at all stages of the work
- › Fatigue-free working thanks to ergonomic balance
- › Robust and long service life due to high-quality stainless steel with scratch-resistant coating
- › Work with daylight quality
- › Natural reproduction of red tones
- › Can be dismantled for thorough cleaning
- › Thermo washer disinfectable and sterilizable
- › Developed for the W&H electric motor EM-19 LC

PD Dr. Jörg Neugebauer
dentist specializing in oral surgery.

»Fast cutting without vibration.
Also for use with local anaesthetics.«

IA-400

- › Torque control for risk-free tightening of the retaining screw
- › Automatic stopping when the adjusted torque is reached
- › Constant speed saves time
- › Cordless for ease of use
- › Small head for the best view
- › Torque wrenches and ratchets are now redundant

Dr. Ulrich Fürst
specialist in oral surgery.

»Incredible – cuts Piezomed
through bone like butter.«

Piezomed

- › Automatic instrument detection
- › Three individual operating modes
»Power«, »Basic« and »Smooth«
- › Temporary 20% power increase thanks
to boost function
- › Ideal illumination of the operating site
through LED ring illumination
- › Efficient cooling thanks to spray opening close
to the instrument's working area
- › Handpiece with LED socket and cable,
thermo washer disinfectable and sterilizable

For a **simple work process**

Safe, simple and flexible.

Implantmed impresses users with its intuitive user interface and simplifies your treatment process. Every single Implantmed stands for top quality, precision and safety.

Osstell Beacon interface

- › Bluetooth connection to Osstell Beacon for simple measurement of implant stability

Implantmed Plus

Secure placement

The automatic torque control guarantees the required security. It can be adjusted from 5 to 80 Ncm.

Measurable stability

Implant stability can be measured precisely with the W&H Osstell ISQ module, available as an accessory.

With intuitive ease

Colour touch screen with user-friendly menu guidance and glass surface for easy cleaning.

For the dental assistant

The new pump design makes insertion of the coolant hose secure and quick.

Absolute freedom of movement

With the wireless foot control you can select the optimum position in the work area without restrictions. This means complete safety in the treatment area.

One for all

Control the functions of the Implantmed and Piezomed with only one foot control.

Implantmed Plus with ioDent® system

Implantmed Plus offers a surgical device that includes the unique »ioDent® system«. The intelligent W&H solution will increase safety in the practice and resources can be planned in advance to increase efficiency.

Easy data management
Share information with other clinicians or with patients.

Plan your operation

You can plan your operation in advance with the »Online Treatment Setup« and transmit the configuration to your Implantmed Plus. An integrated implant manufacturer database* sets all parameters before the operation.

* W&H Dentalwerk Bürmoos GmbH accepts no liability for ensuring that the information is up to date, correct and complete.

Traceability and safety

The USB stick is a thing of the past! Trace your surgical procedures with the »Online Documentation Protocol« – completely automatic, easy and secure.

Always up-to-date
You will always be state-of-the-art with the functional extensions on the ioDent® online platform.

Personal Online Dashboard

Whether device status or required service: »Online Device Monitoring« provides you with an overview of your connected devices.

ioDent® Gateway mini

The gateway is the link between your devices and the online platform. The number of connected devices is unlimited.

Focus on the essentials

Ergonomic, simple, powerful.

Implantmed impresses users with its intuitive ease of use. You can fully and completely concentrate on the most important aspect: your patients.

Implantmed Classic

Powerful motor

With a motor torque of 5.5 Ncm and a motor speed range of 300 to 40,000 rpm, Implantmed is an impressively powerful instrument.

Fatigue-free operation

In combination the short motor and the ergonomically shaped contra-angle handpiece are perfectly balanced. You can work for long periods without fatigue or cramp in your hand.

Easy to use

Its new display with auto backlight makes Implantmed easy and uncomplicated to use.

Stress-free healing

The automatic thread cutter function supports you when inserting implants in hard bone. It prevents compression of the bone.

Number 1 in the operating theatre

Safe, reliable, powerful.

The W&H Elcomed has been designed specifically to meet the requirements of maxillofacial surgery, dental surgery and implantology.

Elcomed

Everything at a glance

Revolutions per minute, torque and selected coolant flow rate all at one user level.

Complete documentation

Every step of the treatment is saved to a USB flash drive. The data is accessible at any time.

Automatic thread cutter function

Prevents excessive bone compression while screwing in the implant.

Convenient foot control

The multifunctional foot control allows sterile working and optimum freedom for your hands.

An amazing motor

Shortest and lightest motor with 50,000 revolutions per minute.

SPI Dongle – Upgrade at any time

Control the functions of Elcomed with the wireless foot control, available as an accessory.

Fatigue-free and flexible operation

Durable, ergonomic and robust.

Whether you are inserting an implant or extracting a wisdom tooth, you can be sure of optimum cooling and illumination of the treatment site. High-quality stainless steel with a scratch-resistant coating makes the surgical straight and contra-angle handpieces robust and gives them a particularly long service life.

WS-75 L | 20:1

Specially designed for preparation of the implant site and implant insertion.

S-11 L | 1:1

The first choice for apical resection, osteotomy, sequestrotomy, bone modelling and bone smoothing and also for extraction of wisdom teeth.

WS-91 L | 1:2,7

45° head

Specially designed to improve access in the premolar and molar region.

WS-56 L | 1:1

WS-92 L | 1:2,7

Designed for osteotomy, sequestrotomy, germectomy, hemisection.

Surgical straight and contra-angle handpieces for Implantmed SI-1023, SI-1015, SI-1010

Fatigue-free operation

Combination with the ultra-short EM-19 electric motor allows long periods of work without fatigue.

Optimal illumination

Thanks to it being half the size of a normal LED, the mini LED+ can be integrated very close to the tip and offers optimal illumination.

Variable cooling

There are spray clips available for the left and right. This means that cooling can be adapted to the individual requirements.

Scratch-resistant surface

The unique coating protects the straight and contra-angle handpiece from scratches. This facilitates cleaning and preserves the value.

Hexagon chucking system

The hexagon chucking system developed and patented (EU, USA) by W&H ensures safe use even at high torques.

Perfect cleaning

To satisfy the stringent hygiene requirements, the straight and contra-angle handpieces can be dismantled.

Leader in LED technology

Clear, bright and wide field of view.

Excellent lighting conditions facilitate accurate diagnoses and perfect treatment results. The surgical straight and contra-angle handpieces with mini LED+ produce light independently. An integrated generator supplies the LED in the instruments with power.

The contra-angle handpieces WS-91 and WS-91 L G with 45° head unite the advantages of straight and contra-angle handpieces. The 45° angle allows considerably better access and considerably better visibility of the treatment site. This is particularly helpful in the surgical extraction of wisdom teeth, precise tooth separations and apical resections. This makes palatal access to the maxillary molars much simpler, even with a small mouth opening. In contrast, in buccal applications, there is more space between the cheek and the operating site. At the same time, the view is barely affected. Depending on the drive speed, the ratio of 1:2.7 makes it possible to achieve speeds of up to 135,000 revolutions per minute on the rotating instrument. A triple spray guarantees sufficient cooling of the rotating instrument and the tooth.

Surgical straight and contra-angle handpieces with generator

WS-75 (without light)
WS-75 L G (with mini LED+)
Models specially designed for implantation.

WS-56, WS-92 (without light),
WS-56 L G, WS-92 L G
(with mini LED+)
These models are outstanding for difficult surgical procedures.

WS-91 (without light)
WS-91 L G (with mini LED+)
The 45° angle allows considerably better access and considerably better visibility of the treatment site.

S-9, S-11 (without light)
S-9 L G, S-11 L G
(with mini LED+)
The first choice for complex jaw procedures.

S-10, S-12, S-15 (without light)
Improves the view of areas where access is difficult.

WI-75 E/KM (without light)
Model specially designed for implantation.

For precise torque control

Practical, fast and no risk.

The single-handed operation means the cordless prosthodontic screwdriver is fast and, most importantly, safe and provides the best possible view of the treatment site.

Prosthodontic screwdriver

Precise torque control
Adjustable from 8 to 40 Ncm in 1 Ncm steps. This allows precise, risk-free tightening of retaining screws.

Key pad
Activate the prosthodontic screwdriver with the key pad.

Cordless operation
No obstacles for your prosthodontic screwdriver with modern Li-Ion battery technology.

Small head for a clear view
Nothing blocks your view of the treatment site.

Constant speed saves time
At 25 revolutions per minute it takes less than 10 seconds to tighten a retaining screw.

Lubricated for life
The thermo washer disinfectable and sterilizable contra-angle handpiece is lubricated for life and must not be oiled.

The new force in bone surgery

Minimally invasive, maximum power.
 Piezomed facilitates the surgeon's work: thanks to innovative ultrasound technology, only bone substance is resected with high precision. The surrounding soft tissue remains uninjured. A noticeable relief for the patient: less pain, quicker healing!

Piezomed

Automatic instrument detection
 Piezomed detects the instrument during insertion and sets the correct power class automatically.

Innovative LED ring illumination
 The shadow-free light ensures ideal illumination of the operating site.

Improved cutting precision
 A new, specialized tooth design guarantees precision cutting and saves time!

Extremely powerful and fast
 The boost function can be used to increase the set basic power by 20% for a short period of time.

Efficient cooling
 The spray exits near the instrument's area of activity and cools the operating site extremely efficiently.

SPI Dongle – Upgrade at any time
 Control the functions of Piezomed with the wireless foot control, available as an accessory.
