Dental Nitrous Oxide Sedation

Anxiety free experience with Nitrous Oxide Sedation

The German Society of Oral and Maxillofacial Medicine estimates that up to 61% of the population fear the visit to the dentist. 20% of this percentage are considered to be highly anxious, and up to 10% avoid dentist completely due to severe anxiety.*

Baldus has the solution for you and your patients:

Inhalation sedation with nitrous oxide and oxygen – is suitable for all ages. Your patient's fear or anxiety will be greatly reduced which will make for a far better atmosphere for both the patient and dentist. This will also allow for a better and more efficient treatment.

Nitrous oxide, or N_2O , has been used successfully for more than 160 years in dentistry. The mix of N_2O and O_2 is the safest most researched and oldest sedation method. It's safe and non-toxic and when treatment is finished, the patient is given 100% oxygen, and within 15 minutes after session the patient is N_2O free. Compared to general anesthesia, the patient is fully conscious and able to communicate.

How does nitrous oxide work? During the treatment oxygen and nitrous oxide are mixed which is individually to the patient's needs. It starts with 100% oxygen then N_2O is raised successively until desired sedation is reached. While the patient is inhaling and exhaling the oxygen-nitrous oxide mixture, you and your team can start the treatment. Finally, the patient inhales 100% oxygen again, and within 15 minutes after session the patient is N_2O free.

The advantages of Nitrous Oxide Sedation

- + REDUCTION OF PAIN SENSITIVITY**
20% nitrous oxide has the same analgesic potency as 15mg morphine sc.
- + A MORE GENTLE SEDATION**
No anesthesia – patient is conscious and cooperative.
- + REDUCED GAGGING REFLEX**
Decreased gagging reflex and retching makes treatment faster and more comfortable.
- + EFFICIENCY & TIME SAVING**
A patient with less anxiety is more cooperative and can be treated much more efficiently.
- + TITRATION**
Optimal sedation by individually adjusted nitrous oxide mixture!
- + ALMOST NO RISKS**
 N_2O is a sedative with the lowest side effects!
- + NO ADVERSE EFFECTS**
Gentle sedation. No metabolism (< 0.1 %).
Recovery occurs within a few minutes.
Fit to drive within 15 minutes.
- + MILLIONS OF PATIENTS**
Millions of patients worldwide have been treated with nitrous oxide and have overcome their anxieties regarding dental treatment. Almost everyone would choose nitrous oxide again.
- + MARKETING & SERVICE**
Nitrous Oxide Sedation can be a unique selling point with a positive marketing effect for your practice.

OXYGEN-NITROUS OXIDE MIXER

» The core of each Nitrous Oxide Sedation, the Mixer Unit.

Baldus presents two types of mixer units from its own production. The **Baldus® Analog** with its elegant design and its intuitive handling. The digital mixer unit **Baldus® Touch** combines the latest technology and innovative features and is a world debut on the dental nitrous-oxide market throughout the world.

What is the difference between the Baldus mixer units and other Oxygen - nitrous oxide mixer units?

The world debut Baldus® Touch

Timeless elegance combined with high technology – the Baldus® Touch.

Our everyday lives are unimaginable without the use of touchscreens. The Baldus® Touch is the next generation of digital oxygen - nitrous oxide mixer units. The new display menu functions and system settings give the Baldus® Touch the status of a modern and distinctive mixer unit on the dental nitrous-oxide market.

+ US PATENTED

+ HIGH-TECHNOLOGY

- **Touch-function** with a brilliant screen resolution.
- **Easy documentation** for the patient's treatment parameters and patient's ID.
- **Thermic measurement** works essentially independent from pressure and temperature, so therefore guaranties a shorter reaction time.
- **Software & Hardware Watchdog** guaranty safety.

+ BALDUS® TOUCH FEATURES

- **Recovery button:** at the end of all sedation treatments the recovery button is pushed, which will produce a flow of 100 percent oxygen and a countdown will start.
- **Error memory:** in the documentation memory there is an error memory, which records the last 20 erros, which can be used for an analysis with the dentist and the Baldus service team.
- **Maximum total flow of 18 l/min:** The breathing bag will always be filled sufficiently, especially for patients with anxiety problems or patients with a bigger lung volume.

+ HIGH SAFETY STANDARDS

- **Self-test** at power on, also in Standby mode.
- **Nitrous oxide lock** when lack of oxygen.
- **Acoustic and visual information signals.**
- **User-friendly single button control.**
- **Red O₂-Flush-Button** for immediate, 100% oxygen supply.
- **Non-rebreathing valve** on the Bag-T.
- **Ambient air valve** on the Bag-T.
- **O₂ Demand Mask-Port.**
- **Standard coding of the gas types.**

>> The 21st Century Mixer Unit The Baldus® Touch

+ HYGIENIC DESIGN

- **Fast and easy cleaning** due to flat fronts and rounded corners.
- **Intelligent placement** of the ambient air valve under the Bag-T protects from dust and other pollutants.
- **Filters** where the gas enters to keep any impurities away.
- **Microbiological testing:** requirements regarding the hygienic standards during production and packing are 100% fulfilled.

- + US Patented
- + Touchscreen
- + Automatic data documentation
- + Automatic lead out by recovery button
- + Maximum total flow of 18 l/min
- + O₂-Flush-Button
- + Self-test-function & error memory
- + Software & Hardware Watchdog
- + Thermic measurement

Mixer Unit „Baldus® Touch O₂/N₂O Mixer for Analgesia“

Details:

- Digital mixer unit controlled via HQ-touchscreen
- Max. mixing concentration 50%, 60% or 70% N₂O (Standard delivery 70%)
- Mixing ratio is precisely settable over the % arrow key
- Automatic adjustment of the outcoming flow (user-friendly single-button control)
- Oxygen Flush for an immediate oxygen supply over a red-signal button
- Upgraded premium safety package with acoustical and visual information signals
- Self-test-function
- Automatic nitrous-oxide stop in case of lack of oxygen
- Non-rebreathing valve on the Bag-T
- Ambient air valve (when reservoir bag empty)
- Connection coding of the gas types
- O₂-Demand Mask-Port
- USB-Port
- Oxygen nitrous oxide mixer unit offers the possibility of installation in the All-in-One-Cart 15005T, in a hollow wall or in the door of a working unit
- Input voltage: 110/ 230V AC, 50-60Hz
- Dimensions (Height x Width x Depth): 136 x 300 x 119 mm
- Weight: 2,5 kg
- US Patented No. 10,065,159 B2

Delivery contains Mixer Unit and Bag-T; without mounting and scavenger system.
3 years warranty when concluding a maintenance agreement.

4.495,00 €

Baldus® Analog

+ US PATENTED

+ HIGH-QUALITY ROBUST MATERIAL

- Rugged in design and with over 92% of the mixer unit manufactured in **aluminium and stainless steel**

+ HYGIENE

- More **hygienic and easy to clean** due to flat surfaces with less prominent edges
- **The installation comes with a fresh air valve** which is under the Bag-T to prevent infiltration of dust and other pollutants

+ NEW FEATURES

- **Acoustic signal** in the event of a lack of oxygen (decrease in pressure under 3 bar)
- **Tamper-resistant:** Opening the mixer is only possible with a purpose-built-in tool
- Due to a **maximum flow** of 15 l/min the bag is always sufficiently filled
- **Centrally-placed an O₂ flush button** for a 100% oxygen supply and a quick reaction
- **Easily-readable nitrous oxide concentration:** Baldus® Analog displays the percentage of nitrous oxide concentration and not the oxygen concentration → no need to convert the gases concentration, therefore less misjudgement

Mixer Unit „Baldus® Analog O₂/N₂O Mixer for Analgesia“

Details:

- Max. mixing concentration 50%, 60% or 70% N₂O (Standard delivery: 70% N₂O)
- CE-certified
- Mixing concentration precisely adjustable by %-N₂O regulator
- Automatic adjustment of output flow in case of increased N₂O-intensity (single-button operation)
- ISO colour coding
- Red marked O₂ flush button at the front of the device for immediate oxygen supply
- Premium safety package
- Automatic nitrous oxide stop and advisory tone in case of a lack of oxygen
- Non-rebreathing valve
- Ambient air valve (when the reservoir bag empty)
- Coding of the gas types for connection
- O₂ Demand Mask-Port
- Connection for emergency ventilation mask
- Width x Length x Height: 155 x 148 x 270 mm
- US Patented No. 10,065,159 B2

Delivery contains Mixer Unit and Bag-T; without mounting and scavenger system.
3 years warranty when concluding a maintenance agreement.

BALDUS® SCAVENGER BREATHING SYSTEM

» The eco-friendly companion for the Nitrous Oxide Sedation.

The double nasal mask system from Baldus® is the „green“ innovation on the world nitrous oxide market. The development and production is 100% made in Germany.

What makes the Baldus® double nasal mask scavenger system one of a kind?

+ SUSTAINABILITY

- Eco-friendly mask system.
- All parts – the tube system and the outer and inner mask with all the connectors – are autoclavable.
- Cost-saving – no consumption items.

+ HANDLING

- Unrestricted space for the dentist and his team.
- Easy handling.
- Markings and different sizes for an easy set up procedure.
- The patient's breathing can be constantly observed due to the translucent materials of the outer mask.
- The Baldus® Scavenger System is compatible with all oxygen-nitrous oxide mixer units.

+ SAFETY

- Special focus was put on the Scavenger System regarding leaking gases and air contamination during design development.
- The choice of userfriendly flexible materials ensures a perfect fit to all patient's face shapes.
- For greater safety the connectors have a bridge that avoids any mistakes when assembling the masks.

- ✓ Sustainable
- ✓ Eco-friendly
- ✓ High-quality

The Baldus® double nasal mask scavenger system – the eco-friendly system for the inhalation sedation with nitrous oxide.

**MADE
IN
GERMANY**

+ MATERIAL

- Use of translucent, soft and supple silicone.
- Latex free and autoclavable.
- Biocompatibility confirmed.

+ PATIENT COMFORT

- The userfriendly material prevents uncomfortable pressure marks on the skin of the patient.
- An oval membrane allows a minimal resistance during exhaling, which ensures a better and easy discharge exhaled gases.
- Thanks to the bigger volume of the inner masks, which allows optimal flow for the patient's inhaling and exhaling.

Operating mode of the mask system:

How does the Baldus® Scavenger Breathing System work? Because of the exhalation in the inner mask the membrane opens and the exhaled gas enters the outer mask. The suction in the outer mask is separate from the inner mask, so the patient can breathe without resistance. This reduces the straw effect from other mask systems.

The double nasal mask system protects the dentist and his team successfully from the exhaled gas. The supple, autoclavable nasal masks are easy to change and available for adults and children, which are available in different colours and scents: Blueberry Dance, Bouncy Bubble, Happy Apple, Strawberry Delight and Chilla Vanilla.

Baldus® Double Mask Scavenger System

Inhalation Phase

Delivery of the oxygen-nitrous-mixture.

Exhalation Phase

The exhaled gas flows via the oval membrane and the aerodynamic located channels optimal to the vacuum channel.

Exhalation Phase

Minimized loss of N₂O molecules because of the accurate fitting. The few molecules that leave the sealed Baldus® inner mask are sucked off from the unique deep-fitted Baldus® outer mask via the vacuum.

BALDUS® SINGLE USE INNER MASKS

Baldus® stands for quality, service and innovation.

Scented masks excite not only kids, but also the adults. The inner masks for our sensitive noses can enjoy the pleasant natural fragrances during the nitrous oxide sedation – which has no effect on the Baldus quality. Exact opposite – Baldus has managed to establish new standards: simplified handling for you and your team, better absorption of the N_2O gas molecules and better wearing comfort for the patient. Absolutly latex free.

Our wish is that your patients feel safe in your good hands, which will always bring the patients back for further treatments. We offer you selective, high quality and certified equipment to complete your Nitrous Oxide Sedation System.

Baldus® Vacuum Control Block

Details:

- CE-marked
- Vacuum control block with regulator valve for controlling and adjusting the suction of the Nitrous Oxide Sedation System (white/transparent)
- Installation between vacuum hoses
- Including autoclavable vacuum hose

Art.-No.	Article
16002	Baldus® Vacuum Control Block

149,00 €

Reservoir Bag

Details:

- CE-marked
- Autoclavable and latex free
- Steam sterilization: 134°C, 5 min.

Art.-No.	Article
15015-3L	3-Liter Reservoir Bag (Adult)
15015-2,3L	2,3-Liter Reservoir Bag (Pedo)
15015-1L	1-Liter Reservoir Bag

66,00 €

Nitrous Evacuator

Details:

- Active vacuum pump
- Nitrous oxide discharged directly into the open air
- Suitable for all scavenger systems
- Alternative of suction device on dental chair

- Height x Width x Depth: 227 x 302 x 154 mm
- Weight: 5,5 kg
- Voltage: 220-240V
- Frequency: 50/60Hz

Art.-No.	Article
15030	Nitrous Evacuator

910,00 €

Ultraslim Pressure Reducer O₂

» Hand connection for O₂ pressure cylinders of Nitrous Oxide Sedation System

Details:

- Adjusted to 4,5 bar
- Including medical fabric hose
- DIN Cylinder Germany (NIST and DISS connection)
- Including adapter for local gas cylinder connection

Art.-No.	Article
15020	Ultraslim Pressure Reducer O ₂

425,00 €

Ultraslim Pressure Reducer N₂O

» Hand connection for N₂O pressure cylinders of Nitrous Oxide Sedation System

Details:

- Adjusted to 4,5 bar
- Including medical fabric hose
- DIN Cylinder Germany (NIST and DISS connection)
- Including adapter for local gas cylinder connection

Art.-No.	Article
15021	Ultraslim Pressure Reducer N ₂ O

425,00 €

Regulators with Connection for O₂ and N₂O

» Regulators International Fittings:
PIN INDEX, BULLNOSE, BENELUX BULLNOSE, AFNOR, UNI 4406

Details Oxygen PIN-INDEX Pressure Reducer:

- Inlet, 1 x DISS Outlet
- Non Therapy

O-Ring for pressure reducer

Details:

- O-Ring for oxygen O₂ or nitrous oxide N₂O standard pressure reducer
- Set of 10 O-Rings

Art.-No.	Article
1125714	O-Ring for oxygen O ₂ standard pressure reducer
104746-4	O-Ring for nitrous oxide N ₂ O standard pressure reducer

price per set: 38,00 €

Nasal cannula flow set

Details:

- Adapting connector and locking adapter for the Bag-T of the mixer unit
- 10 nasal cannulas

Art.-No.	Article
16040	Nasal cannula flow set

96,00 €

Multiparameter Patient Monitoring Deluxe70

Details:

- Oxygen saturation display, pulse rate, blood pressure, ECG, respiration and temperature
- TFT-Display in colour, 17,7 cm
- Suitable for hospitals, practices and private home
- For adults and children
- Free memory for 800 blood pressure readings and 24h ECG-curves
- Rechargeable battery
- Power connection possible
- 100-240VAC, 50/60Hz
- Visual and acoustic alarm
- Safety standard: IEC 60601-1
- Made in China

Prince 100C1 Finger Clip Pulse Oximeter

Details:

- CE-certified: 0123
- Automatic ON/ OFF (finger sensor)
- Pulse rate and oxygen saturation display
- Plethysmogram display in real time
- Acoustical observable pulse
- Full-colour LED display
- Automatic screen rotation in 4 directions, easy to read
- Changeable to perfusion index display: display of finger circulation (low perfusion can lead to incorrect SPO2 signal)
- Visual and acoustic alarm
- Alarm limit individually adjusted
- Anti-motion technology
- Small and lightweight
- Low battery consumption (lasts up to 30 hours)
- Including 2 AAA batteries and device case
- Made in China

Art.-No.	Article
100C1	Fingerclip Adult
100D2	Fingerclip Child

159,00 €

SpO₂ Monitor (Pulsoximeter) with Finger Sensor OxyTrue A

Details:

- Oxygen saturation display (SpO₂), pulse rate, plethysmogram, bar graph, short-term and long-term trend
- Alarm limit individually adjusted
- Intelligent linking of visual and acoustical information and signals
- Automatic suppression of surrounding light
- Signal quality display
- Fuzzy logic for extreme fast measurement display
- Intuitive operation with explicit error messages
- Data memory with integrated data management
- SpO₂ Monitor ideal for rescue service, device and sensor are extremely robust
- High speed data transmission via standard USB port
- Selection of 18 languages
- Use of device: continuous operation for more than 2 days / power saving mode up to 4 days
- Weight: approx. 160g (without batteries and sensor)
- Including SC 6500 Soft-Cap Sensor, PC software, USB data cable, silicone protector, batteries
- Made in Germany

Central Gas Supply

Our quality management and our ISO 13485 certification make it possible to carry out the planning, montage and service of medical gas supply systems.

A central gas supply system offers several major advantages:

- Cost saving – gas cylinders at a central location result in less handling
- Higher safety level because of high pressure gas storage and installation located in specified and safe place
- Uninterrupted gas supply with automatic changeover
- Warning signal at low gas pressure
- Visual integration in the modern design of your practice

Please contact us at any time. We will be pleased to support you with our expert's advice about the central gas supply and the possibilities to install the system in your practice.

**MADE

Gas Manifold – Changeover System

» Fully automatic changeover manifold oxygen or nitrous oxide, AGS 35

Details

- Changeover unit for regulation, supervision and control of medical and technical gas supply units
- 2 x 1 cylinder with pneumatically-controlled change-over
- 2 high capacity gas pressure regulators
- Outlet nominal pressure 3-10 bar
- 2 connection bends made of copper (copper pipe 8 x 1,5 mm)
- Procedural message
- Bottle bracket for 2 gas cylinders of 50 l volume
- Signs-Set

Further information available upon request.

Gas Manifold – Single Cylinder System

» Pressure reducer for one cylinder oxygen or nitrous oxide

Details

- Outlet nominal pressure 3-10 bar
- 1 connection bend made of copper (copper pipe 8 x 1,5 mm)
- Procedural message
- Bottle bracket for 1 gas cylinder of 50 l volume
- Signs-Set

Further information available upon request.

Controllpanel for Manifold

» Medium Monitor equipped with an innovative glass display

Details

- Indication via illuminated LCD display
- Information on current status (OK and warning of high and low pressure)
- Operation by means of touch keys
- Visual and acoustic signals
- Communication of several emergency signals via bus system
- 3 potential-free contacts

Further information available upon request.

Medical Gas Outlet O₂ / N₂O

Details

- Simple installation – for concealed installation, for surface (on plaster) installation
- Fast connection and disconnection
- Designed for medical environment, small size and easy to clean

- Complies with colour coding and description by standard
- DIN-Standard

Further information available upon request.

Flowmeter DIN Direct

Details

- Flow rates adjustable in 9 levels from 0 to 15 L/min.
- Supply pressure max. 5 bar
- Body made of anodized aluminium
- DIN Connector
- DISS O₂-Outlet

- For direct connection to medical gas outlet
- Exit for nasal cannula or resuscitation bag

Maintenance

» Baldus Medizintechnik GmbH offers a maintenance and inspection service.

In order to protect both patients and staff, you have maintenance and safety checks carried out by Baldus Medizintechnik GmbH or an authorised service partner once a year.

The technical personnel of Baldus Medizintechnik travels throughout Europe for the highest priority in your practice is the medical care of the patients.

Maintenance and safety inspections of oxygen-nitrous oxide mixer

In the need of maintenance or repair, send in your oxygen-nitrous oxide mixer for inspection to Baldus Medizintechnik GmbH. This service is valid worldwide. For Europe our qualified personnel is also available for a visit in your practise.

Maintenance interval and safety inspection of oxygen-nitrous oxide mixer: annual service

Maintenance of central gas supply

We offer maintenances for the following central systems:

- Oxygen
- Nitrous Oxide
- Compressors, compressed air

A regular maintenance of the central gas supply is indispensable.

A continuous supply of medical gases is necessary for all patients. In case of a gas system breakdown it can have life-threatening consequences for patients and also be very costly.

Additional maintenances

The technical team of Baldus Medizintechnik carries out maintenance also for the following sectors:

- + Quality control of compressed air required by European Pharmacopoeia
- + Terminal Units (gas outlets) Air, N₂O, O₂
- + Anaesthetic scavenging systems
- + Ceiling-mounted supply units
- + Compressed air preparation for breathing air

We control and maintain devices of the following manufacturers:

- Baldus®
- Porter
- Matrx
- Further producers on request

Further information on request.

n₂o-Academy Workshops

TRAINING FOR NITROUS OXIDE SEDATION

» The professional use of nitrous oxide sedation. We will make you fit in the shortest time!

Certification according to the Council of European Dentists resolution 2012.

The n₂o-Academy workshops include the presentation and explanation of all important aspects of nitrous oxide sedation. To be allowed to sedate with nitrous oxide, a dentist has to attend 10-12 hours workshop (CED resolution 2012).

Workshop Content:

- + Pain and anxiety in dental medicine
- + History of nitrous oxide
- + Characteristics and effects of nitrous oxide
- + Range of applications
- + Medical indications and contraindications
- + Legal aspects
- + Ambient air contamination and compliance
- + Equipment technology
- + Dental office marketing
- + Economic efficiency calculation; Billing
- + Role play & practical application
- + Emergency- and quality- management
- + Examination and Certificate handover

Our seminar instructors and lecturers are highly qualified experts with years of experiences with nitrous oxide sedation.

Workshop information:

For our workshops, we see a big importance in extensive theoretical information, but also the practical part!

Each member of your team has the opportunity to attend our workshop. Your assistant will be trained and qualified to apply the sedation method professionally and with high standards.

Private training worldwide:

Would you like to certify more employees and colleagues in the nitrous oxide sedation at your practice? No problem. We can offer our workshop as well as Inhouse workshop for up to 20 participants.

Further information available on request!

» INFORMATION

According to the Council of European Dentists every dentist has to visit a 2-day workshop (at least 10 hours) before using nitrous oxide for sedation.

Trust the specialists in MEDICAL GASES AND INHALATION SEDATION

» Our service has been evaluated by doctors who use nitrous oxide as being a grade 1 (1.4), the highest possible grade

» INFORMATION

All prices are net price, excluding shipment and TAX. Please pay attention to our regular sales conditions.

Baldus Medizintechnik GmbH will not be liable for patient treatment and improper handling. The treating physician is responsible for patient monitoring and needs to provide a certificate of competence. Please read the instructions for use carefully and in full before first operating the device in order to protect you and your patients from any incorrect operation.

Please note, that the images may deviate slightly from the products supplied.
